

integrate2 – the efficient connection between ECAD and PLM-Systems

Integrate your ECAD design development process – with the centralized management of native design data and the generation of BOMs, fabrication and assembly data.

THE CHALLENGES

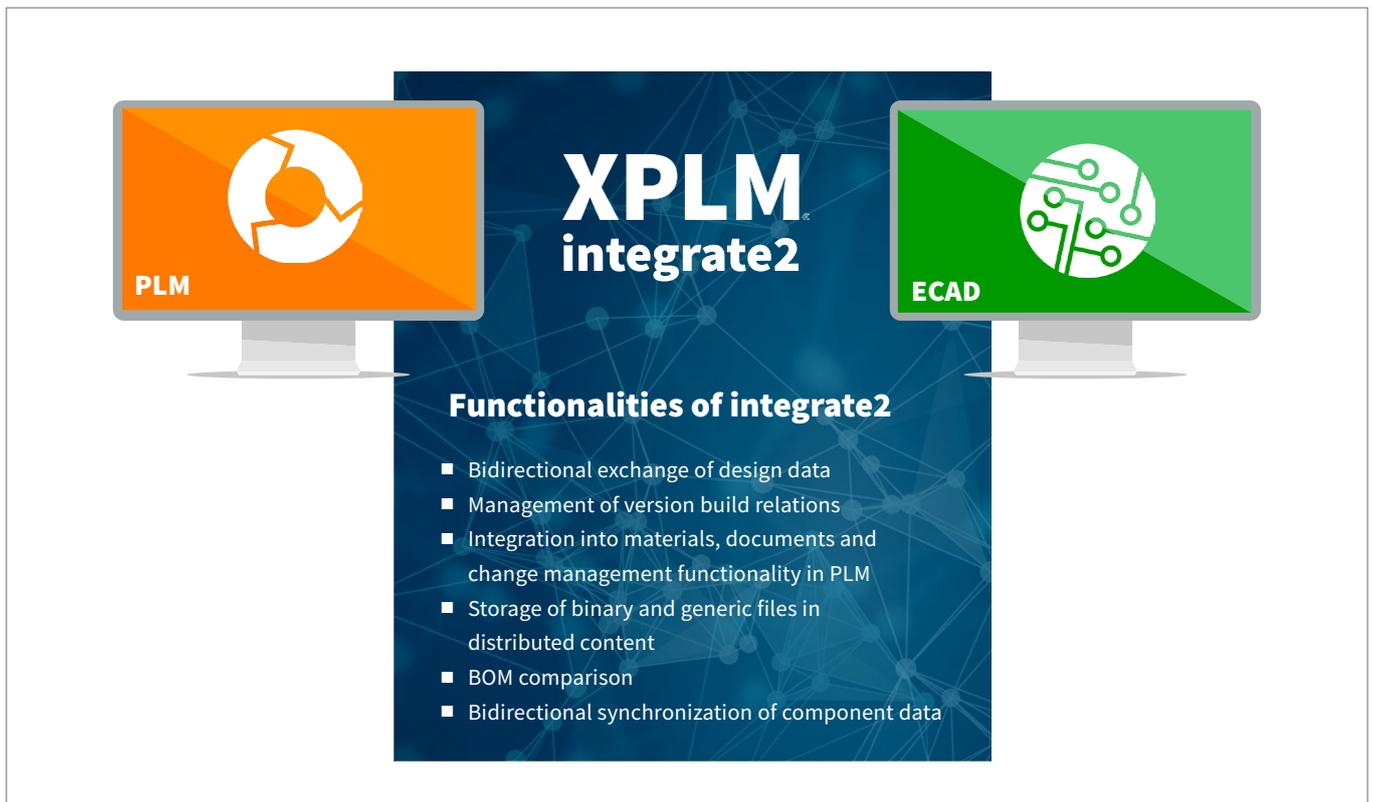

The needs for consistent information flows and processes, and to be able to launch innovative and high-quality products, are just some of the challenges companies face when trying to manage the efficient collaboration of design teams across various locations.

Coupled with the new challenges created for businesses by „digital transformation“ and the prevalence of Industry 4.0 and IoT, firms are increasingly searching for a solution to facilitate cross-disciplinary cooperation in their production of complex products.

THE SOLUTION

Developed by XPLM, integrate2 enables an integrated approach to connect your ECAD design workflow to the complete product design ecosystem. This allows cross-discipline collaboration across design teams and combines mechanical, electrical, embedded software and electronic design data on a single platform.

Using integrate2 allows for ECAD design data to be managed more consistently, improving efficiency, agility and process reliability and providing engineers a complete view of their product data. Designers can now access, publish and synchronize information without leaving their familiar ECAD design environment. The integrated approach moreover enhances the ability to hit release dates, cost targets, product quality and feature set goals.

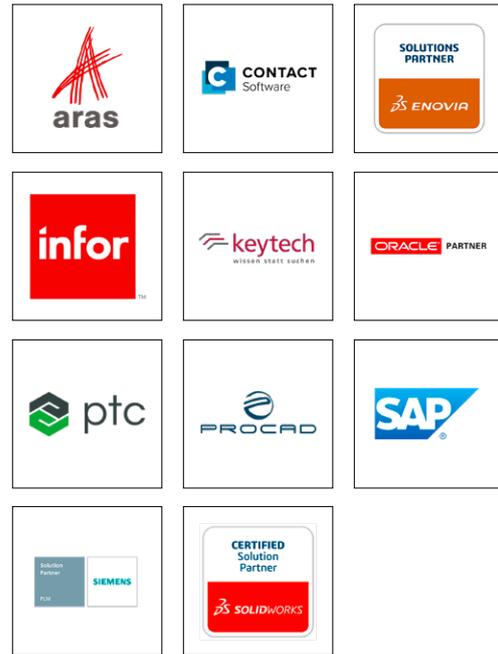

MAIN FEATURES

integrate2 manages native ECAD design data and the generated manufacturing data inside PLM by using standardized functionalities:

- Starting new projects with default project templates
- Complete release of projects including automatic creation of fabrication and documentation outputs into PLM
- Automatic population of parameters in drawing frames
- Generation of bill of Materials including design variants
- Comparison of bill of Materials during save of the design project
- Check-in and check-out capabilities
- Bidirectional synchronization of library content
- Extensive search capabilities
- Easy linking of data to other PLM objects
- Solid audit trail via status log

AVAILABLE PLM SYSTEMS

AVAILABLE ECAD SYSTEMS

ECAD ELECTRIC	ECAD ELECTRONIC	ECAD EDM
AutoCAD Electrical	Altium Designer	Altium Concord Pro
ELCAD	Cadence Allegro	Altium Nexus
Engineering Base	Cadence OrCAD	Cadence Allegro EDM
EPLAN	Mentor PADS	Cadence OrCAD EDM
SOLIDWORKS ELECTRICAL	Mentor XPEDITION	Mentor EDM
Mentor Capital	PULSONIX	Zuken DS E3*
		Zuken DS CR*

*on request

KEY BENEFITS

- Save time and eliminate errors through consistency in automated data exchange processes and data model
- Avoid redundancy by using a single integrated platform
- Achieve holistic traceability of your product development processes by incorporating ECAD design data into the business processes
- Make design information accessible to users outside the ECAD world
- Enhance collaboration through simplified multi-site data exchange
- Prevent duplicate data entry in ECAD library & PLM
- Adapt the integration functionalities to your operational processes
- Shorten your search times to access design data more quickly
- Avoid manual processes

ABOUT XPLM

XPLM is an independent PLM service provider and system integrator. XPLM develops integration solutions between leading PLM, MCAD, ECAD, SysML, ERP, Office, Requirements Management and ALM / Software tools for an efficient, repeatable and error-free product development process.
